

PlantAdapt 2018 12-14 September 2018, Banyuls-sur-mer, France

Confirmed Speakers and titles*:

*14 talks still opened for selection from abstracts

- Magnus Norborg:** Epigenetic variation in *Arabidopsis*
- Christophe Maurel:** Root hydraulics: a key trait in plant adaptation to stresses
- Andreas Niebel:** Understanding the mode of action of the NF-YA1 transcription factor during medicago-rhizobia symbiosis
- Montse Martín Hernández:** Resistance to Cucumber mosaic virus in melon: A matter of failing to pay the toll
- Soraya Pelaz:** Silencing reveals novel roles for RAV genes in flowering and carpel development in rice
- Julio Saez-Vasquez:** Ribosomal RNA processing and modifications: implications in ribosome biogenesis and activity
- Maria José Aranzana:** Somatic mutations, a source of variability in perennial crops
- Fabien Mounet:** Water deficiency and potassium supply trigger interconnected signals to modulate wood formation in Eucalyptus
- Marie Mirouze:** Mobilome-seq and Nanopore sequencing: two complementary approaches to unravel genome dynamics in plants
- Fabrice Roux:** Identification of adaptive loci associated with natural variation of microbiota and pathobiota in *Arabidopsis thaliana*
- Jean-Marc Deragon:** Heat-induced post-transcriptional gene reprogramming

The deadline for registration is June 1st , 2018 at <http://lgdp.univ-perp.fr/>
