

Summer School

Biological interactions from genes to ecosystems

July 09th to 15th 2016

Domaine de Ramonjuan, Pyrénées

As part of its training program, the TULIP Labex organizes its fifth Summer School in integrative Ecology and Biology

The scientific program covers genetic, molecular, physiological and ecological aspects of **interactions between organisms** in microbial, plant and animal biology. In a **privileged working environment** you will meet top Toulouse researchers as well as top **international experts** working in these fields, and experience an innovative training using **project-based learning**.

Some of our speakers

Robert E. Ricklefs - Department of Biology, University of Missouri, USA

Paul Schulze-Lefert - Max Planck Institute for Plant Breeding Research, Germany

Robert D. Holt - Department of Biology, University of Florida, USA

Sophie Goormachtig - VIB Department of Plant Systems Biology, Belgium

Tom Van Dooren - Institute of Ecology and Environmental Sciences Paris, France

Yves Maufette - Université du Québec à Montréal, Canada

Jean Clobert - Station d'Écologie Théorique et Expérimentale, Moulis, France

Plus 7 eminent researchers from the TULIP research labs in Toulouse!

Free accommodation and stay are provided to all participants
Apply on www.labex-tulip.fr before **April 25, 2016**
